Git Commands

git init

Creates a new Git repository in the project folder so Git can track the files.

git add .

Adds all files and folders in the current project to the Git staging area.

git status

Shows the current Git status and tells which files are ready to be committed.

git commit -m "Added assignments"

Saves the staged files as a version in Git with a message describing the changes.

git branch -M main

Renames the current Git branch to main.

git remote add origin <GitHub repository URL>

Connects the local project folder to the GitHub repository.

git push -u origin main

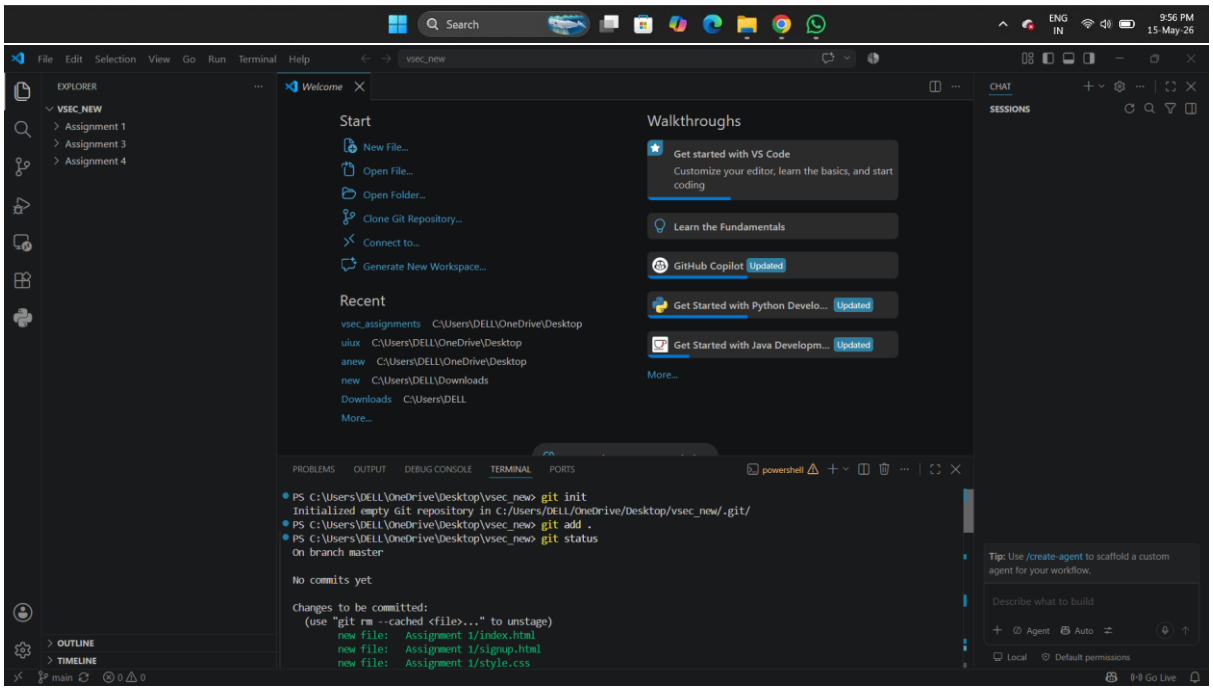

Uploads the local main branch and all committed files to GitHub.

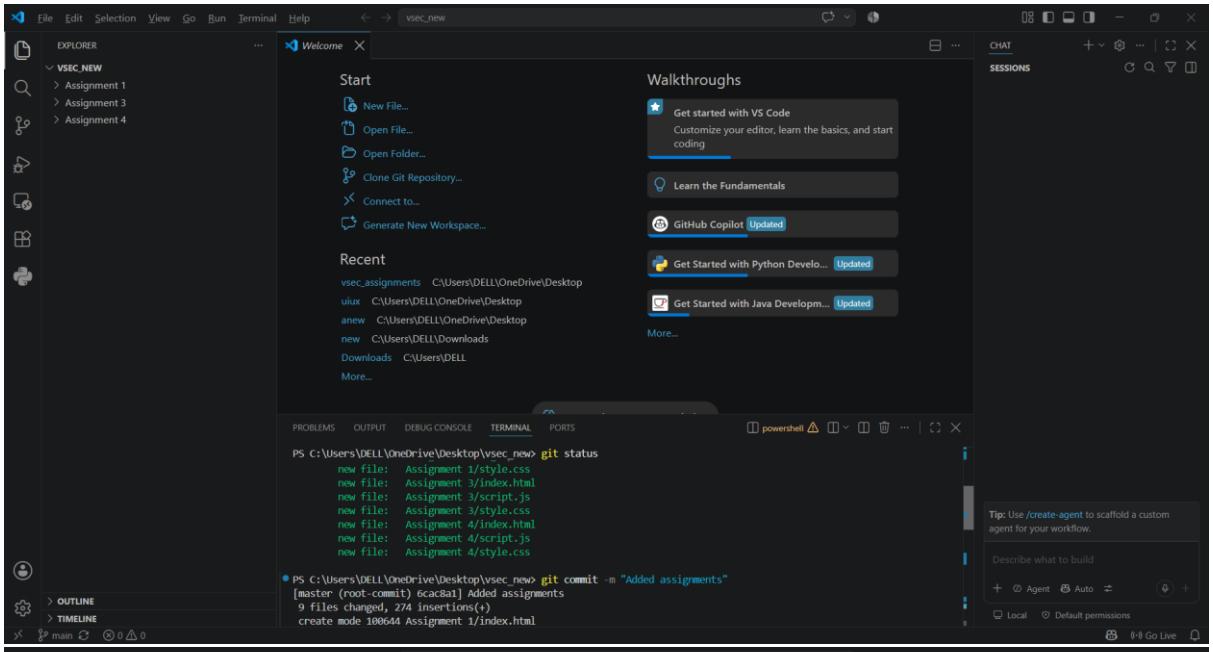

git add .

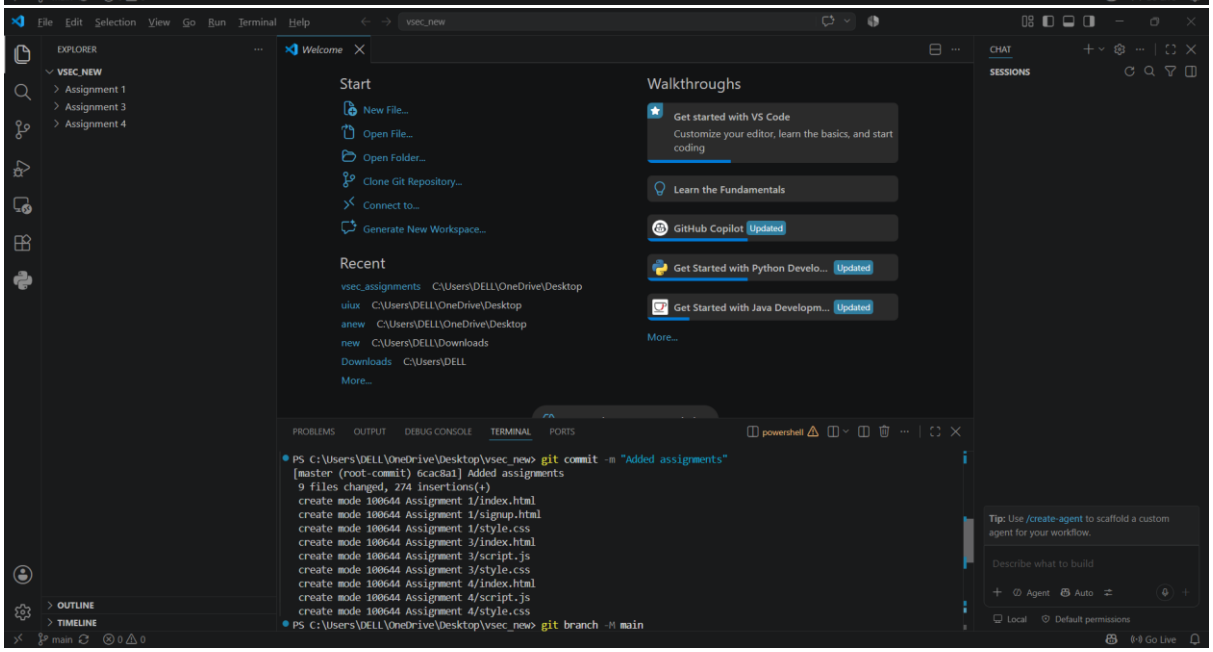

Adds any new or modified files to the staging area.

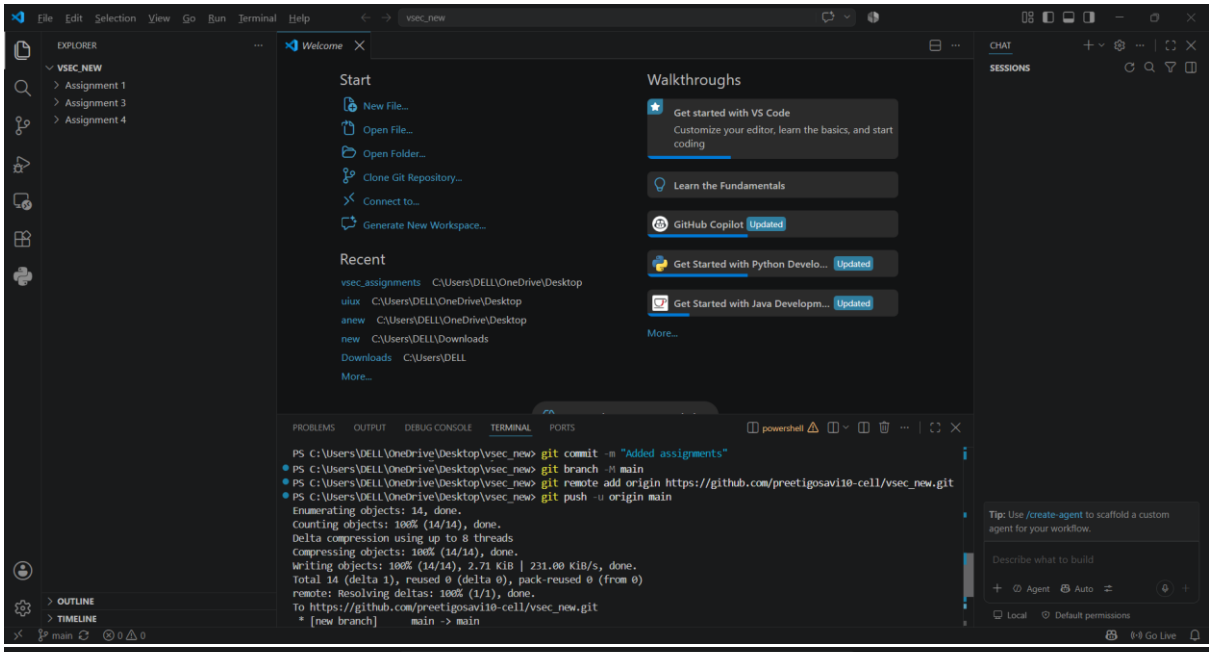

git status

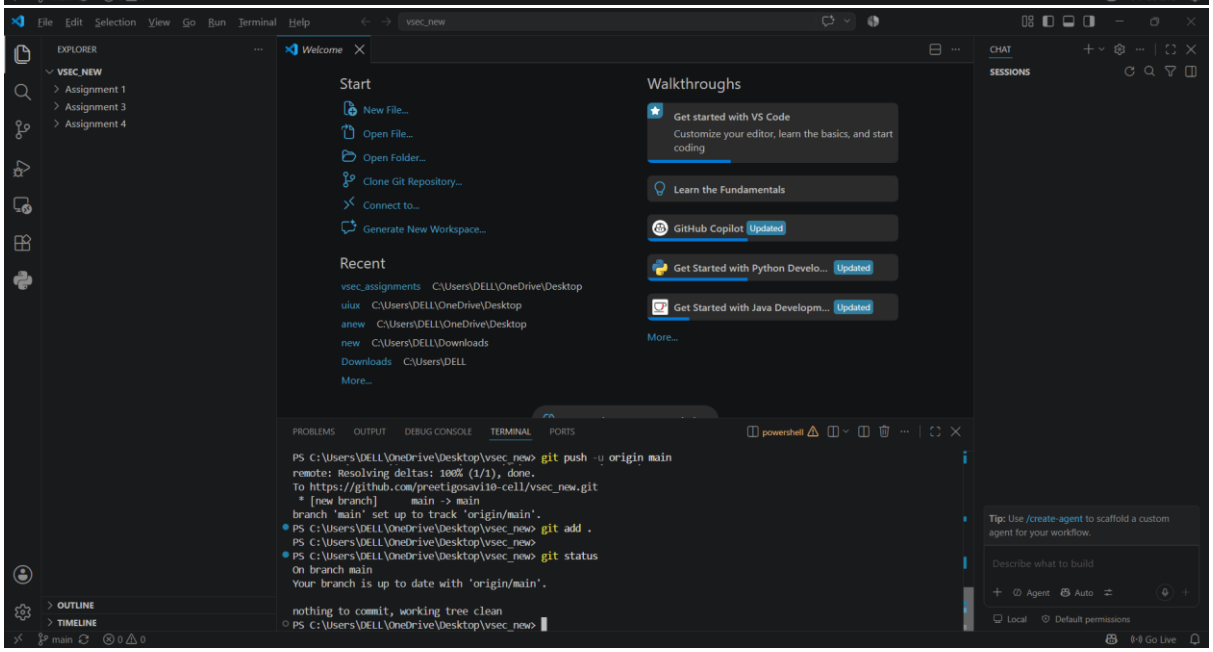

Checks whether there are any uncommitted changes and confirms that the project is up to date.
